Topical Cream and Ointment Containers

To make application of topical products easier for you, Sand Run Pharmacy is using capped, push-up jars.

- Simply remove the white or colored cap and gently push up from the bottom to dispense what is needed.
- Your container may have a pink, blue, beige, or yellow nozzle in the opening to control the amount desired and for ease of application.
- If your container is large, a spindle will be provided to assist you in pushing the bottom of taller jars up.

Please don't hesitate to ask the pharmacist if you have any questions or would like further demonstration.
